

The graph displays the relationship between the current I (in kA) and the impedance Z (in Ohm) for a 10 kV busbar with 9 feeders. The lines represent the current limit for each feeder, showing a linear decrease in current as impedance increases. The lines are labeled 1 through 9 in the legend.

Feeder	Approx. Z_{min} [Ohm]	Approx. Z_{max} [Ohm]	Approx. I_{min} [kA]	Approx. I_{max} [kA]
1	1.5	4.7	20.0	35.0
2	2.1	5.5	20.0	35.0
3	2.8	6.4	20.0	35.0
4	3.2	6.8	20.0	35.0
5	3.5	7.1	20.0	35.0
6	3.8	7.6	20.0	35.0
7	4.1	8.1	20.0	35.0
8	4.4	8.6	20.0	35.0
9	4.7	9.2	20.0	35.0
